# BioDrop MD® Spray

**Brand:** PIILOSET
**Product Code:** 0032
**Availability:** In Stock
**Weight:** 0.02kg

## Short Description

**Piiloset BioDrop MD® Spray**
Micro emulsion spray for dry eyes and eye lids.

## Description

**BioDrop MD® Spray**

Micro emulsion spray for dry eyes and eye lids.

**Innovative composition**

sea buckthorn oil and hyaluronan
BioDrop MD Spray micro emulsion is intended for moisturizing dry eyes and eyelids. The moisturizing effect is based on the innovative and unique composition of natural active ingredients sea buckthorn seed oil and hyaluronan. Improves quality of tear fluid.
Dry eye problems are often caused by disturbances in tear film that cause water to evaporate too quickly. The micro emulsion rectifies and strengthens the structure of the tear film: with every blink of an eye a small amount of BioDrop MD Spray spreads on the ocular surface and strengthens the tear lipid layer thus preventing excessive evaporation of water. The moisturizung effect is quick and long-lasting

**Generous 17 ml dispenser**
The dispenser equals to 300 doses of moisturizing spray. A sterile bag-in-bottle shrinks during use and protects the micro emulsion from oxidizing effects of the air. Due to intentional overfill, a small volume of the solution will remain in the dispenser.

**Composition**
Sea buckthorn seed oil, hyaluronan, glycerol and emulsifiers

## PIILOSET BIODROP MD® SPRAY

*Micro emulsion spray for dry eyes and eye lids*

### INNOVATIVE COMPOSITION: SEA BUCKTHORN OIL AND HYALURONAN

BioDrop MD Spray micro emulsion is intended for moisturizing dry eyes and eyelids. The moisturizing effect is based on the innovative and unique composition of natural active ingredients sea buckthorn seed oil and hyaluronan.

### IMPROVES QUALITY OF TEAR FLUID

Dry eye problems are often caused by disturbances in tear film that cause water to evaporate too quickly. The micro emulsion rectifies and strengthens the structure of the tear film: with every blink of an eye a small amount of BioDrop MD Spray spreads on the ocular surface and strengthens the tear lipid layer thus preventing excessive evaporation of water. The moisturizung effect is quick and long-lasting[2].

### SEA BUCKTHORN OIL TREATS EYES AND SKIN

Sea buckthorn seed oil decreases dry eye symptoms, supports the structure of tear fluid and moisturizes mucous membranes. Also, its natural antioxidant compounds protect the ocular surface and the skin against cell damage and speed up their healing[3]. Sea buckthorn oil is rich in Omega fatty acids-3, -6 and -9 and vitamin E that are important for eye and skin health.

According to studies, when applied topically, sea buckthorn oil has anti-inflammatory effects and shows beneficial effects on moisturizing skin and mucous membranes[3,4].

Furthermore, hyaluronan protects the eye from cell damages and supports tear fluid composition by retaining moisture and lubricating the surface of the eye[5].
